## Topics Discussed:

As we are approaching final weeks, we worked really hard this week to finalize things. We worked on the part of sign in, database and other important functionalities of the program using java. As for the webpage, we have again talked regarding its design and how to communicate more with the audience by making the website interactive. A draft of both the webpage and program will be provided on the GitHub account.

## Decisions Made:

- We fixed the errors on activity diagrams.
- We fixed the optional and mandatory relationships on ERD.
- We added some functional requirements on the document of requirements.
- We completed some of the requirements we hadn't finished.
- We began work with state and sequence diagrams.
- We modeled some drafts of the certificates that will be awarded to the students.
- We worked on the database, sign in form of the program.
- We worked on the front end of the webpage

## Tasks Assigned:

- To complete wiki pages.
- To finish the diagrams we haven't done yet.
- To make the webpage functional as we can fully dedicate our time to the program.

**Time, Place, and Agenda for Next Meeting:** Tuesday 1 June, 18:00 as a first meeting.
